Thank you for purchasing a product STAYER! We congratulate you for purchasing a product STAYER. Whether you apply it to DIY work, the results will be of unquestionable quality.

The trimmers are equipped with hand tools a small electric motor in this case serves dual blade for cutting and shaping all types of hedges.

1_SPECIFIC SAFETY INSTRUCTIONS

DO NOT let comfort or familiarity with product (gained from repeated use) replace strict adherence to hedge trimmer safety rules. If you use this tool unsafely or incorrectly, you can suffer serious personal injury.

Keep all parts of the body away from the cutter blade. Do not remove cut material or hold material to be cut when blades are moving. Make sure the switch is off when clearing jammed material. A moment of inattention while operating the hedge trimmer may result in serious personal injury.

Carry the hedge trimmer by the handle with the cutter blade stopped. When transporting or storing the hedge trimmer always fit the cutting device cover. Proper handling of the hedge trimmer will reduce possible personal injury from the cutter blades. Keep cable away from cutting area. During operation the cable may be hidden in shrubs and can be accidentally cut by the blade.

Do not use the hedge trimmer in the rain or in wet or very damp conditions. The electric motor is not waterproof.

First-time users should have an experienced hedge trimmer user show them how to use the trimmer.

The hedge trimmer must not be used by children or young persons under 18 years of age. Young persons over 16 years of age may be exempted from this restriction if they are undergoing training under the supervision of an expert.

Use the hedge trimmer only if you are in good physical condition. If you are tired, your attention will be reduced. Be especially careful at the end of a working day. Perform all work calmly and carefully. The user is responsible for all damages to third parties.

Never use the trimmer when under the influence of alcohol, drugs or medication.

Check to make sure that the voltage and frequency of the power supply correspond to the specifications given on the identification plate. We recommend the use of a residual-current-operated circuit breaker (ground-fault circuit interrupter) with a tripping current of 30 mA or less, or an earth leakage current protector.

Work gloves of stout leather are part of the basic equipment of the hedge trimmer and must always be worn when working with it. Also wear sturdy shoes with anti-skid soles.

Before starting work check to make sure that the trimmer is in good and safe working order. Ensure

guards are fitted properly. Check cable for damage before starting work and replace if necessary. The hedge trimmer must not be used unless fully assembled.

Keep cable away from the cutting area. Always work in such a way that the extension power cord is behind you.

Remove plug from the mains immediately if cable is damaged or cut.

Make sure you have a secure footing before starting operation.

Hold the tool firmly when using the tool.

Do not operate the tool at no-load unnecessarily.

Immediately switch off the motor and unplug the mains plug if the cutter should come into contact with a fence or other hard object. Check the cutter for damage, and if damaged repair immediately.

Before checking the cutter, taking care of faults, or removing material caught in the cutter, always switch off the trimmer and unplug the mains plug.

Switch off the trimmer and disconnect and secure the mains plug before doing any maintenance work.

When moving the hedge trimmer to another location, including during work, always unplug the mains plug. Never carry or transport the trimmer with the cutter running. Never grasp the cutter with your hands.

Clean the hedge trimmer and especially the cutter after use, and before putting the trimmer into storage for extended periods. Lightly oil the cutter and put on the cover. The cover supplied with the unit can be hung on the wall, providing a safe and practical way to store the hedge trimmer.

Store the hedge trimmer with the cover on, in a dry room. Keep it out of reach of children. Never store the trimmer outdoors.

MISUSE or failure to follow the safety rules stated in this instruction manual may cause serious personal injury.

2_INSTRUCTIONS FOR USE

PLACEMENT TOOL

Tool designed for cutting and / or shaping hedges. Always use both hands.

The operating instructions always have to be on hand at the place of application of the machine!

Trying to get too far with a short hedge, especially from a ladder, is extremely dangerous. Do not work from any staggering or non-firm surface.

ASSEMBLY

CAUTION: Always be sure that the tool is switched off and unplugged before carrying out any work on the tool.

- The machine is assembled.

Engage the extension cord

CAUTION: Make sure that the extension cord is unplugged to the mains outlet.

When connecting the extension cord, the cord of the machine use the hook 4 to secure the cable and avoid disconnections and possible cable cuts by the same machine.

Always watch where the wire.

ILLUSTRATED DESCRIPTION

- 1 Start switch.
- 2 Safety switch.
- 3 Hand guard.
- 4 Hook.
- 5 Blade.
- 6 Side cover.
- 7 Blade Guard.
- 8 Hand guard screws.
- 9 Set screws fastening blades.
- 10 Main handle.

3 OPERATING INSTRUCTIONS

START

For safety reasons the machine does not work if the two hands are not in a safe position.

To start the machine with one hand push the safety switch 2, while the other presses the start switch 1.

Keep blades lubricated for best cut. See instructions on maintenance.

CAMBIO DE HERRAMIENTAS

Only a correct insertion of the blades is guaranteed to work well and that the aforementioned safety position is effective. This is why the blade change must also be carried out in a workshop STAYER.

Sharpening of blade

The blades can only be sharpened by opening the device and intervening in the safety configuration. Only allow the blades to be sharpened by a specialist workshop authorized by STAYER.

Storage

Put the blade cover on the shear blades 7 so that the blades are not exposed. Store the tool out of the reach of children carefully.

The blades can only be sharpened by opening the device and intervening in the safety configuration. Only allow the blades to be sharpened by a specialist workshop authorized by STAYER.

Do not cut dead trees or similar hard objects. Doing so may damage the tool.

In order to uniformly cut the top of a hedge, it is helpful to attach a bead to the desired height of the hedge and cut along it, using it as a reference. (Fig.7).

To cut the side of a hedge uniformly, it is useful to cut from the bottom up. (Fig.8).

Cut boxwood or rhododendron wood from the base to the top for an attractive look and a good job. (Fig.9)

As a basic operation, tilt the blades in the cutting direction and move the hedge clip quietly and gently at a speed of 3 - seconds per meter.

4 MAINTENANCE AND SERVICE INSTRUCTIONS

CLEANING

Maintenance

CAUTION: Always be sure that the tool is switched off and unplugged before attempting to perform inspection or maintenance.

Cleaning the tool

Clean out the tool by wiping off dust with a dry or soapedipped rag.

CAUTION: Do not use gasoline , thinner, benzine or heating oil etc.

Blade maintenance

Smear the blade 5 before and once per hour during operation using machine oil or similars.

After operation, remove dust from both sides of the blade 5 with wired brush, wipe off it with a rag and then apply enough low-viscosity oil, such as machine oil etc. and spray-type lubricating oil.

CAUTION: Do not wash the blades in water. Failure to do so may cause rust or damage on the tool.

REPAIR SERVICE

Our after-sales service responds to your questions concerning maintenance and repair of your product as well as spare parts.

Exploded views and information on spare parts can also be found under: info@grupostayer.com

Our customer consultants answer your questions concerning best buy, application and adjustment of products and accessories.

WARRANTY

Warranty card

Included in the documentation that accompanies this equipment, you should find the warranty card. You should fill out the card completely and return to vendor with a copy of purchasing receipt or invoice and you should receive a receipt.

Note: If you cannot find the warranty card within the documentation, you must ask for it through your supplier.

The warranty is limited only to manufacturing defects and expire if pieces have been removed or manipulated or repaired other than the manufacturer.

DISPOSAL AND RECYCLING

The machine, accessories and packaging should be sorted for environmental-friendly recycling.

Only for EC countries:

Do not dispose of power tools into household waste! According to the European Guideline 2002/96/EC for Waste Electrical and Electronic Equipment and its implementation into national right, power tools that are no longer usable must be collected separately and disposed of in an environmentally correct manner.

Subject to change without notice.

uncertainty K determined according to EN 60745-2-15: $ah < 2.5 \text{ m/s}^2$, $K = 1.5 \text{ m/s}^2$.

The vibration level given in this information sheet has been measured in accordance with a standardised test given in EN 60745 and may be used to compare one tool with another.

It may be used for a preliminary assessment of exposure.

The declared vibration emission level represents the main applications of the tool. However if the tool is used for different applications, with different accessories or insertion tools or is poorly maintained, the vibration emission may differ. This may significantly increase the exposure level over the total working period.

An estimation of the level of exposure to vibration should also

take into account the times when the tool is switched off or when it is running but not actually doing the job. This may significantly reduce the exposure level over the total working period.

Identify additional safety measures to protect the operator from the effects of vibration such as: maintain the tool and the accessories, keep the hands warm, organisation of work patterns.

Wear hearing protection!

Use protective gloves.
